EXPERIENCE

Systango Private Limited   Jan 2023 – May 2023
Frontend Developer Intern   *Indore, Madhya Pradesh*

- Developed and implemented new features for web applications using React.js, HTML, CSS, and JavaScript under the mentorship of senior software engineers.
- Participated in daily stand-up meetings to discuss progress, roadblocks, and solutions for ongoing projects within an agile development environment.
- Assisted in troubleshooting and debugging issues within the software development lifecycle to improve overall system performance and functionality.
- Worked collaboratively with cross-functional teams to design and optimize database schemas, API integrations, and user interfaces for enhanced user experience.

PROJECTS

House Renting Website (Apna Ghar) | *HTML , CSS , Javascript , PHP , SQL*   **Git Repo**
  * Developed "Apna Ghar," a PHP-based web application facilitating property transactions.
  * Implemented robust user authentication and authorization systems.
  * Created an admin panel for managing users, properties, and system settings, providing administrators with tools for moderation and analytics.
  * Leveraged PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap for scalable solutions.

E-Commerce Website | *React.js , HTML , CSS , Javascript*   **Git Repo**
  * Spearheaded frontend development for eCommerce projects using React.
  * Collaborated closely with designers and backend developers to implement user interfaces that optimize user engagement and conversion rates.
  * Built responsive and accessible web applications that adhere to industry best practices and standards.
  * Integrated third-party APIs for payment processing, shipping, and product management.
  * Implemented state management solutions such as Redux for efficient data flow and scalability.
  * Conducted performance optimizations to improve website speed and overall user experience.
